MES1428

MES2428

- Advanced L2 features
- Support for Multicast (IGMP Snooping, MVR)
- Advanced security functions (L2-L4 ACL, IP Source Guard, Dynamic ARP Inspection, etc.)
- Uninterruptible power supply via battery[1]

The switches provide end users connection to networks of large enterprises, small and mid-sized businesses and service providers via Fast and Gigabit Ethernet interfaces.

The switches support Virtual Local Area Networks (VLAN), multicast groups and advanced security functions.

Uninterruptible power supply[1]

MES1428B and MES2428B switches allow to connect storage battery in order to provide uninterruptible power supply in case of 220V line failure. The switches are equipped with power supply unit that allows charging storage battery if 220V supply line is available. The redundant power system provides monitoring for power supply line and notifies on power sources switching.
